**VOLTRIC**

## The next step in racquet evolution

VOLTRIC racquets feature a 'Tri-Voltage System' to bring together the contrasting characteristics of exceptional power and lightning fast racquet handling. Never before has this combination been achieved in a single high-performance racquet. Over five years in development, VOLTRIC will unleash a new era of performance into the world of badminton.

**ARC SABER**

NEW WORLD RECORD SMASH SPEED  
**421 km/h**

The ArcSaber Series of racquets utilise Yonex's exclusive Cup-Stack Carbon Nanotube technology to create a revolutionary blend of power and control.

Positioned at the sides of the racquet frame, this revolutionary technology absorbs and harnesses energy from the shuttle's impact to provide the player with unparalleled feel during every shot. This energy is then transferred into a return a supreme strength and pinpoint accuracy.

# ASICS Indoor

The ASICS Indoor range features the ground breaking I.G.S Technology, also used in the ASICS running range.

The ASICS Impact Guidance System (I.G.S) is a fundamental design philosophy around which ASICS' technical footwear is built.

The aim of I.G.S is to encourage the foot to perform in a more natural manner. This is achieved primarily by encouraging the shoe to work with the foot rather than trying to control it. The main focus of I.G.S is the principle of 'dynamic stability'.

ASICS I.G.S incorporates systems into the shoe, that will address all the forces applied to the foot and lower limb throughout the movements in tennis.
